Speaker

**Erik Graham, CISSP, ISSAP, CEH, Manager - Security Incident and Investigations
Marsh & McLennan Companies**

Biography

Erik Graham is the Security Incident and Investigations Marsh & McLennan Companies. He is responsible for designing the security architecture that protects Marsh & McLennan Companies information assets from a wide range of risks.

Erik has been working in the computer industry for over 20 years with over 18 years directly focused on computer security / information assurance. He has worked in a wide variety of both logical and physical security areas related to computer network attack (CNA) and computer network defense (CND).

Currently he is working in multiple areas such as cloud computing, risk assessment and management, mobile device management, malware analysis, and threat intelligence.

Erik has a Bachelor of Science from the University of Phoenix, a Master of Science in Information Assurance from Norwich University and holds multiple industry certifications to include CISSP-ISSAP, CISM, CRISC and CEH.

Summary

With every passing day the challenge of protecting information systems increases. Information systems are becoming more complex which in combination with users who want more functionality with greater ease of use leads to an ever increasing risk. Staying current on security risks is critical to the protection of those information systems. In this presentation we will cover one of the best ways to stay on top of emerging security risks - DEFCON. DEFCON is the largest meeting of hackers in the US and it is one of the best ways to see and understand the new risks and more importantly their impact on your information systems. If you attended great; be ready to tell us what you learned. If you didn't attend, shame on you; but don't worry we'll fill you in on some the most interesting presentations.
