Title

“Active Shooter Awareness”

Speaker

Paul M. Schaff, MSIS – Special Agent Phoenix FBI, Cyber Crimes Unit

Biography

Special Agent Paul M. Schaff is a Cyber Agent assigned to the FBI Phoenix Division. SA Schaff has a Master’s Degree in Computer Information Systems and Bachelor’s Degree in Finance. SA Schaff worked in computer systems in the financial sector before joining the FBI in 2003. SA Schaff has worked Cyber, Civil Rights, Fraud, Extortion, Intellectual Property, and Innocent Images cases in his career. SA Schaff has the unique distinction of having the first Spam Case go to trial which involved an international spam operation that operated out of 4 countries.

Summary

This Presentation will discuss how to prepare for a possible Active Shooter event, using information from past events that have occurred.

Title

“Nation-State Cyber Warfare How to recognize an attack, defend yourself and defend the enterprise”

Speaker

Dr. Rebecca Wynn, DSc, MBA, CISSP, CRISC, CASP, CICA, CCISO

Biography

Dr. Rebecca Wynn, DHL, MBA, CISSP, CASP, CRISC, CCISO, LPT, ECSA, CEH, CNDA, CIWSA, CIWSP, CCSK, CWNA, GSEC, MCP, MCTS SQL Server 2005, Security+, Security+ CE, Project+, ITILv3, NSA/CNSS NSTISSI 4011-4016.

Named 2017 Cybersecurity Professional of the Year - Cybersecurity Excellence Awards, Chief Privacy Officer (CPO) SC Magazine, Global Privacy and Security by Design (GPSbyDesign) International Council Member, and Women in Technology Business Role Model of the Year 2018 - Dr. Rebecca Wynn is lauded as a “game-changer who is ten steps ahead in developing and enforcing cybersecurity and privacy best practices and policies.” She is a “big picture” thinker who brings nearly 20 years of experience in Information Security, Assurance & Technology. Recently she led the information security, privacy, and compliance pre-acquisition, acquisition and post-acquisition of LearnVest, Inc. to Northwestern Mutual Life Insurance Company – a Fortune 100 company. She is well known for being a gifted polymath, having deep understanding of current cyber security challenges and privacy issues. She has a proven track record of taking companies to the next level of excellence in many sectors including government, financial services, fintech, healthcare, information technology, legal, semiconductors, and retail. Always open to new opportunities.

SONORAN DESERT SECURITY USER GROUP (SDSUG)
Wednesday, November 6, 2019 - UAT - Tempe, AZ
Founder/President SDSUG - Leo J. Hauguel, CISSP, NSA-IAM

Summary

Security researchers been reporting a disturbing trend among organizations that have been hacked: Their systems are often victimized by not just one state-sponsored hacking group, but several. The typical nation state hacking operation involves a fairly complex network of highly trained, highly skilled actors who patiently create malware and other malicious content specifically designed for particular organization. When nation-state hackers do breach an organization, they tend to work quick. That's why organizations need to react fast to a live hacking threat.

- **Join this interactive session as we discuss:**
-
- • **The Big Four Nation-States**
- • **Anatomy of a Nation State attack**
- • **Recent attacks, why they happened**
- • **Regulatory overview including GDPR and CCPA**
- • **Risk and threat predictions including malicious insiders, MSPs and cloud containers**
- • **How to defend yourself and defend the enterprise**

Title

“DEFCON 2019 PART I & II”

Speaker

**Erik Graham, MSIA, CISSP-ISSAP, CISM, CRISC, CEH
Manager – Risk Assessment / Incident Response
MMC Global Technology Infrastructure | Information Security Engineering
Marsh & McLennan Companies**

Biography

Erik Graham is the Security Incident and Investigations Marsh & McLennan Companies. He is responsible for designing the security architecture that protects Marsh & McLennan Companies information assets from a wide range of risks.

Erik has been working in the computer industry for over 20 years with over 18 years directly focused on computer security / information assurance. He has worked in a wide variety of both logical and physical security areas related to computer network attack (CNA) and computer network defense (CND).

Currently he is working in multiple areas such as cloud computing, risk assessment and management, mobile device management, malware analysis, and threat intelligence.

Erik has a Bachelor of Science from the University of Phoenix, a Master of Science in Information Assurance from Norwich University and holds multiple industry certifications to include CISSP-ISSAP, CISM, CRISC and CEH.

Summary

With every passing day the challenge of protecting information systems increases. Information systems are becoming more complex which in combination with users who want more functionality with greater ease of use leads to an ever increasing risk. Staying current on security risks is critical to the protection of those information systems. In this presentation we will cover one of the best ways to stay on top of emerging security risks - DEFCON. DEFCON is the largest meeting of hackers in the US and it is one of the best ways to see and understand the new risks and more importantly their impact on your information systems. If you attended great; be ready to tell us what you learned. If you didn't attend, shame on you; but don't worry we'll fill you in on some the most interesting presentations.
